

Malaria Deaths in Africa: 2000-2014

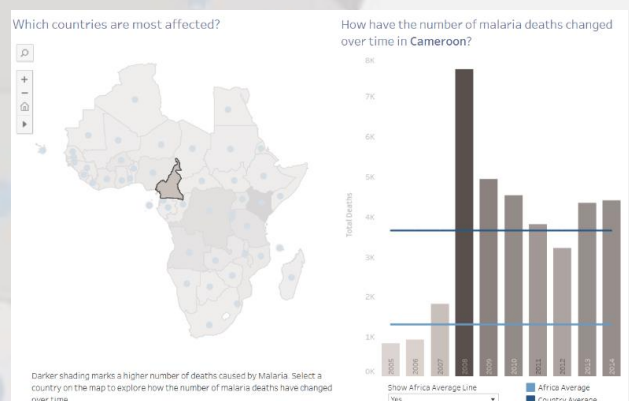

Dose the size of countries have an affection on the malaria deaths?

Algeria Considered as one of the largest African countries. From 2000 to 2014 Algeria recorded 1 death by malaria per year.

In contrast with Algeria, **Sao Tome and Principe**, which is smaller than Algeria by 7412871 km^2 , had an average death due to malaria 300-200 deaths from year 2000 to 2014, but infections of the disses had reduced to the halve in 2005 and continued in this decrease.

Cameron can be taken as an example of medium-sized African country. By looking at the dashboard, the increases of malaria deaths reach to its higher point at more than 7k deaths in the year 2008 until the average malaria deaths became 3,649 per year.

To sum-up most of small-medium countries of Africa show high average of malaria death, this leads to the Idea that short distances increase the infections of diseases.
